International Health Certificate Questionnaire

International travel requirements can be quite variable depending on the location. Please complete the following questionnaire and return it to us **as soon as possible**. Further, we strongly recommend you research the destination country to make sure you have planed enough time to complete all the necessary steps prior to your departure. The information is up to date here:

https://www.aphis.usda.gov/aphis/ourfocus/animalhealth/export/iregs-for-animal-exports/ct_iregs_animal_exports_home

Promptly returning this document will allow our doctors to make your visit as stress free as possible. **As many certificates may take a considerable amount of time to fill out, there can be an extended wait if this information is not supplied ahead of time.**

Veterinary Clinic that administered most recent Rabies vaccine and date performed if other than Pet Calls
: _____

Rabies certificates are usually required to be signed by the administering veterinarian and have the name and description of your pet, the manufacturer, type of vaccine and the date of administration and expiration. Please provide us with copies prior to your visit and bring the certificates with you to your appointment. You may also have the administering veterinarian fax them to us at 561-434-1980

SIGNATURE: _____

DATE: _____

Please bring all other vaccination and medical history to your appointment or have it faxed to 561-434-1980

- Please note many countries are very specific regarding timing of microchip implantation, type of microchip used, vaccines required, timing of vaccines, and specific vaccine requirements. If you have any questions regarding the requirements of the location to which you are traveling, you may visit the website for the USDA-APHIS pet travel (<https://www.aphis.usda.gov/aphis/pet-travel>) and/or the consulate for the country to which you are traveling.
- Depending upon the specified country: additional steps may be needed which may include application for an import permit, specific internal and external parasite deworming, and signatures by the local USDA office. Please call the us or the USDA field office if there are specific unanswered questions.
